

## Paid Lunch Price Report Instructions

The Paid Lunch Price (PLP) Report is required for all School Food Authorities (SFAs) operating the National School Lunch Program (NSLP). SFAs must report the most frequently charged paid lunch price at the elementary, middle/junior, and high school levels as of October. **The report opens for submission November 1 and is due by November 15.**

Please note, SFAs will be unable to enter their October claim online until the report has been submitted.

The PLP report can be accessed via Online Services Log-in ([http://fns.dpi.wi.gov/fns\\_online](http://fns.dpi.wi.gov/fns_online)).

Select “School Programs Paid Lunch Price Report” from the Online Services Log-in dropdown.

Once logged in, select “Other Services” from the “School Nutrition Programs” toolbar.

Then select “Paid Lunch Price Reporting” from the “Other Services” toolbar.

Enter the most frequently charged paid lunch price for each school level in October. Please note, SFAs must enter a dollar value or select N/A from the dropdown.

A screenshot of the "SFA Paid Reimbursement Lunch Price Charges by each Category" form for the school year 2011-2012. The form has three rows for "Elementary Most Frequently Paid Price", "Middle/Junior High Most Frequently Paid Price", and "High Most Frequently Paid Price". Each row has a dollar sign, a text input field, and a dropdown menu. These three rows are circled in red. Below them is a section titled "Charges Reported By:" with fields for First Name, Last Name, Phone Number, Extension, and Email. A "Submit" button is at the bottom.

SFAs that are non-pricing should report 0.00 for the dollar value. SFAs that do not have the specified grade level should select N/A from the dropdown. SFAs with some schools that do not charge for lunches (i.e., Provision 2 schools, select schools within the SFA that are non-pricing, Community Eligibility Provision schools, etc.) would report the most frequently charged lunch price(s) only in the grade level categories of those schools that do charge for paid lunches.

By Each Group of Students**

55-5555 Wisconsin School District

According to Subsection 12(p) of the National School Lunch Act (NSLA) and 7 CFR 210.14(e)(7), SFAs must report their most frequently charged paid student lunch prices, each year, to the Department of Public Instruction (DPI) in each of the following categories: elementary, middle/junior high, and high school. Upon receipt, DPI must then consolidate these prices and report them to the United States Department of Agriculture (USDA).

**Determining the Most Frequently Charged Price:**  
SFAs must report the most frequently charged paid student lunch price established in each grade level category (elementary, middle/junior high school, high school) based on October NSLP reimbursement claims. If multiple prices are charged in any category, SFAs should report the price charged for the majority of paid reimbursable lunches claimed in October. Thus, if meal prices for elementary students within an SFA are set at \$1.50, \$1.60, and \$1.75 and the total number of paid lunches for the elementary category claimed in October was 1,000—the SFA would need to identify the number of lunches claimed at each price. For example, if 650 paid student lunches were purchased at \$1.50, 200 were purchased at \$1.60, and 150 were purchased at \$1.75, the most frequently charged price in the SFA for the elementary category would be \$1.50, as the majority of paid lunches claimed in October, at the elementary grade levels, were charged at that price.

SFAs with no students in one or more of the above grade level categories must select N/A as appropriate. SFAs that do not charge for paid student lunches must enter 0.00 in any or all grade level categories, as applicable. SFAs with some schools that do not charge for lunches (i.e., Provision 2 schools, select schools within the SFA that are non-pricing, etc.), would report the most frequently charged lunch price(s) only in the grade level categories of those schools that do charge for paid lunches.
